

NEWSLETTER

Dear Community,

After 354 days of online learning, we have finally returned to in-person learning. Joy and excitement filled the school as we were all thrilled to be together once again.

I am incredibly proud of our teaching staff, who worked tirelessly to provide high-quality online instructional experiences for all the students. Instructional pedagogy remained high, and students continued to learn all curricular lessons.

Now that we are back in-person, the same high quality instruction that you have come to expect here at SIS@Ciputra will now be inside our classrooms. We are thrilled to be able to once again provide creative, inquiry-based, higher-level, curricular-aligned instructional opportunities for all SIS Ciputra students to continue to further their academic understanding in all subjects taught here at the school.

Please see below for some first week of in-person learning pictures:

Students enjoying a game of football on the pitch during recess.

5LA students built rollercoasters for Science class. They had to adhere to all requirements of the lesson, including creating a structure that was free standing and that allowed the ball to move from the top to the bottom without fail.

A 3LA student drawing a picture for Earth Day.

3LA students engaged in classroom lessons.

3LA student demonstrating her mathematical knowledge with fractions.

SIS@Ciputra Principal Mrs Yaisa Banek

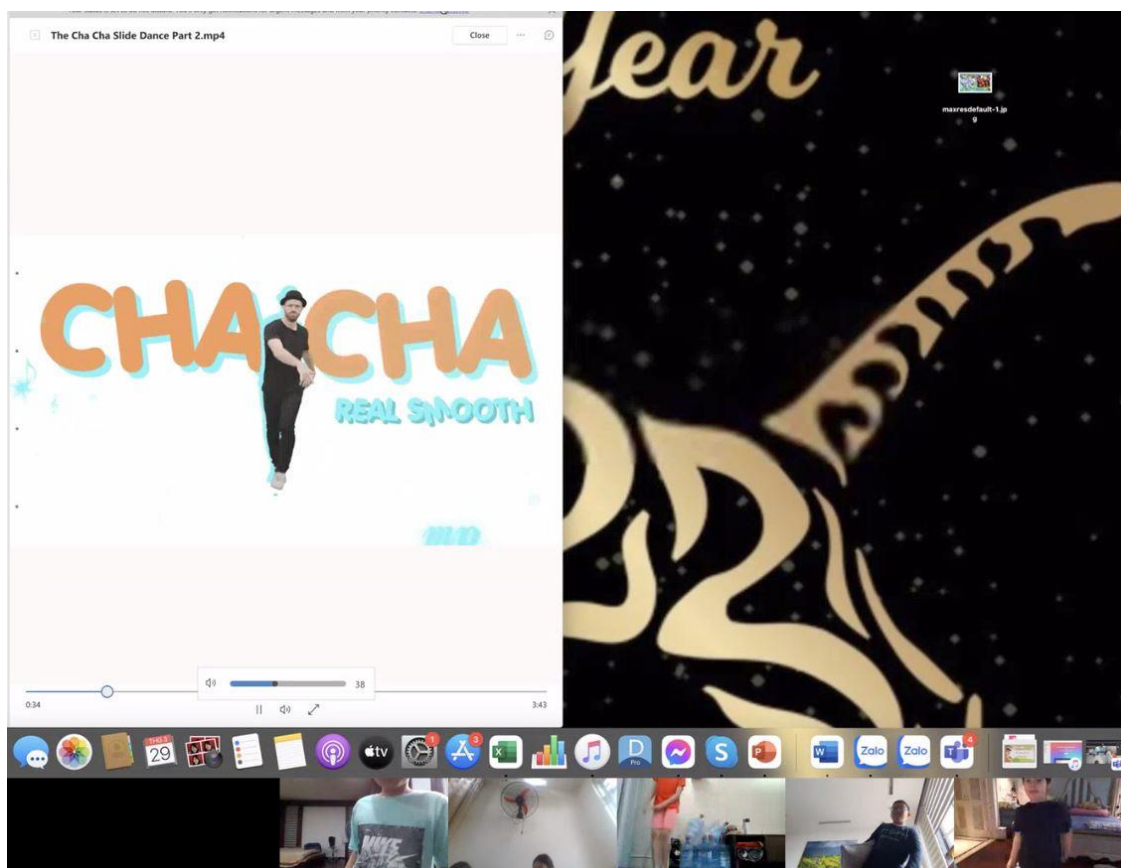

In HPE we Learn to Move and Move to Learn (despite the pandemic) by Mr. Modie

Imagine working out in crowded living rooms with no exercise equipment besides sock balls and empty water bottles.

For many of our students here at SIS Ciputra that's what Physical Education looked like during online learning. Since the onset of online learning, most PE teachers scrambled for creative ways to keep students moving and learning – with no gymnasium, sports fields or playground – at a time when experts say physical and mental health is of prime importance.

Despite the challenges that came, we found ways to continue our P.E. lessons with creative lessons that continued to keep students' bodies moving to help maintain energy levels, focus, and engagement, as well as maintaining physical exercise.

5k protocols against COVID 19 were discussed during our lessons.

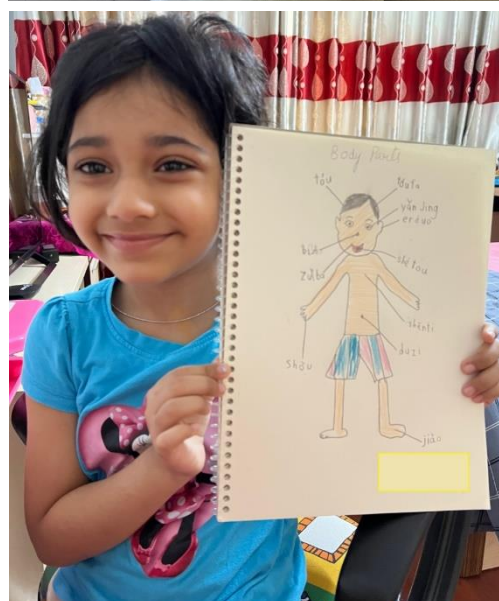

We are thrilled that in-person learning has commenced and we can now engage with HPE lessons here at school.

Chinese with Ms. Nhung

Due to the complications of the Covid-19 epidemic, our children had been studying online at home. Thanks to the valuable companionship, understanding and support of parents, the Chinese classes were conducted smoothly and successfully. The children are making progress day by day and are deeply fond of learning Chinese as the time passes. In this newsletter, I would like to include our student work to show such achievements and progress they have made.

Grade 1 International students are learning about human body parts and simple symptoms of illness. The children made drawings of a human and captioned the body parts in Chinese. Joy and pride can be seen when the children showed off their finished projects.

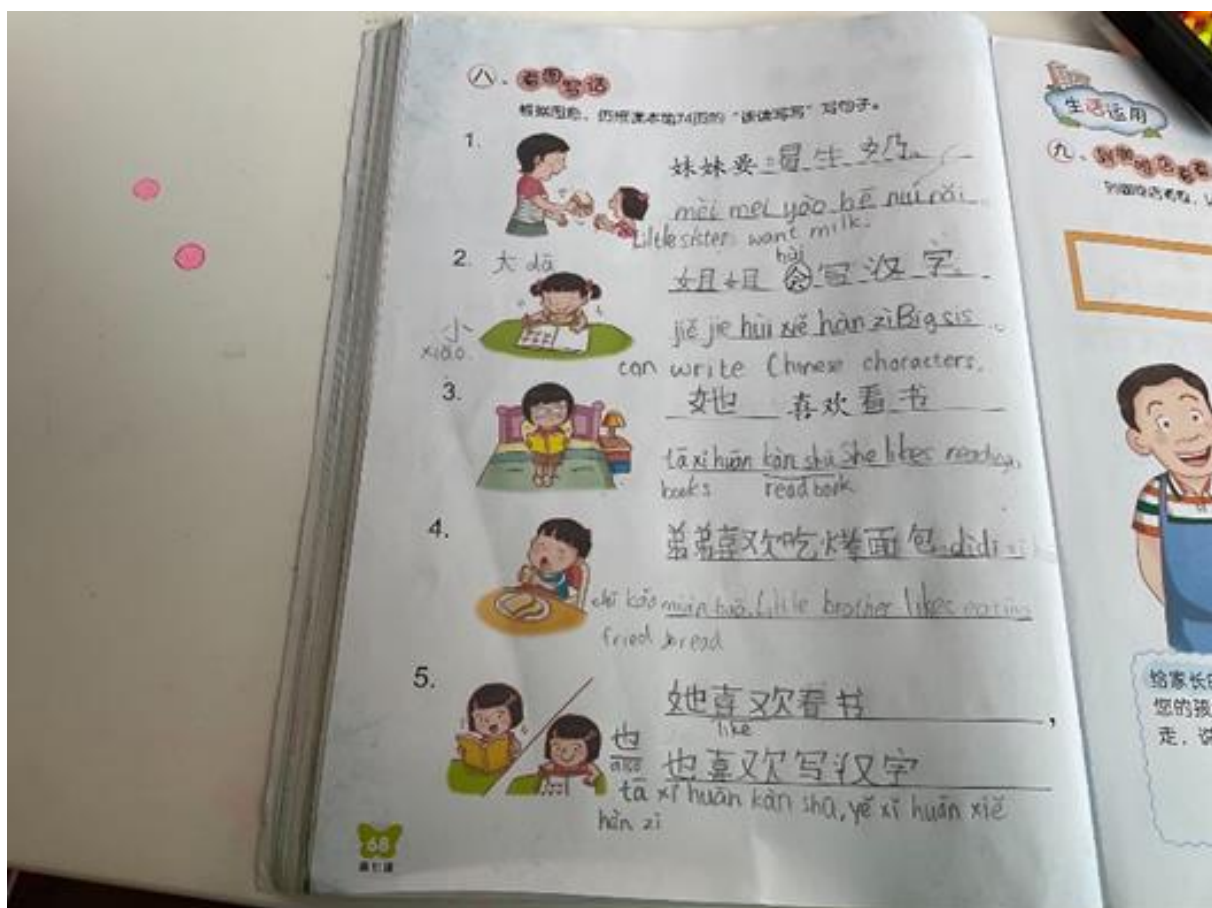

The students of 4LA took the test of lesson 17 in Huanlehuoban 2B (Night market is bustling!). The children passed the test with flying colors. Such achievements can be made surely thanks to the children's hard work and full attention in class.

The 3LA students are working on workbooks in Huanlehuoban 2A lesson 7 (breakfast at the cafe). I feel very proud seeing our students' carefully written and neat Chinese characters. A lot of effort must have been put in to complete their assignment.

The students of 6LA are learning how to tell time in Chinese. High scores are seen in the bloket.com test, all due to their hard work.

Once again, we would like to thank parents who have supported the teachers and children during this time and hope to continue our companionship in the future.

Best regards,

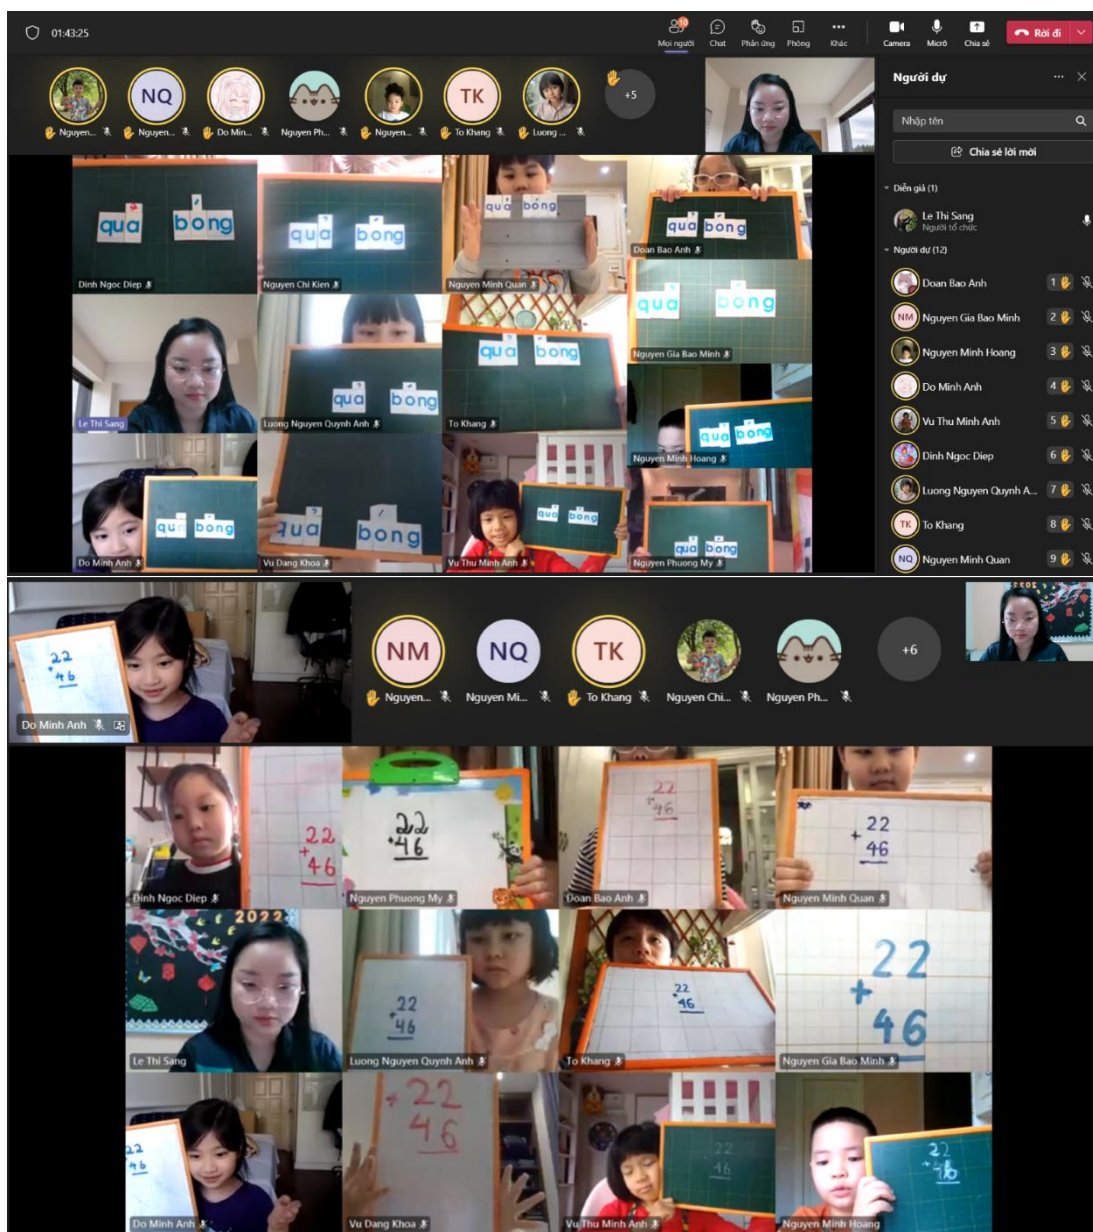

Ms. Nhung

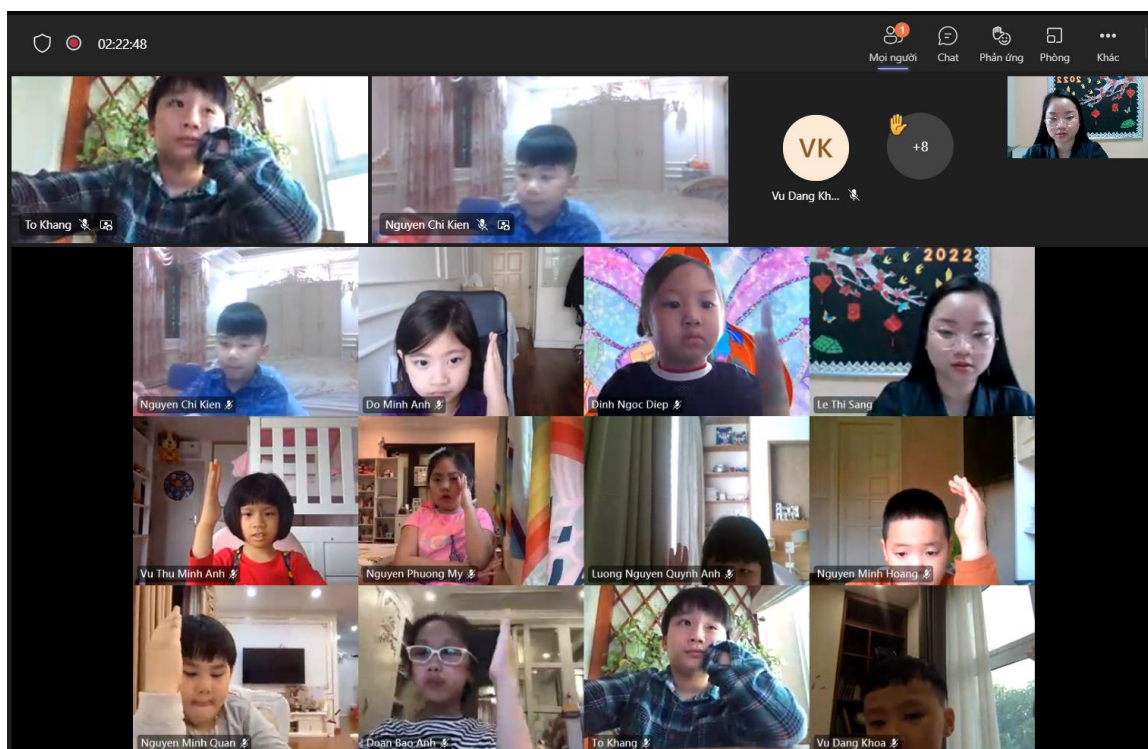

Learning with Ms. Sang in Classroom 1A

Class 1A Integrated is a class of 12 very lovely students. From the beginning of the school year, the form teacher has aimed to flexibly use applications such as Quizizz, Kahoot, and Forms to build excitement in each lesson.

In math lessons, the children have the opportunity to explore many ways to add and subtract numbers within 100. If looking for guidance, any students of class 1A can confidently guide other classmate with their learning tasks. Therefore, each math lesson goes by smoothly when the children know how to support each other.

In story-telling lessons, students were extremely fond of role-playing and retelling the story in front of the class. The children embody their role, flexibly using familiar toys at home as props. From there, the children practice their memory and creativity in narrating a story and confidently present it in front of the whole class. Comments are also being made after each presentation to encourage each other.

By the end of term 3, the students had had exciting online lessons and achieved good results in their studies. Class 1A is always ready to return to school with even more interesting learning activities waiting ahead.

Thank you,
Ms. Sang
